

LITEX – Aluminium alloy container

light

strong

stackable

spraytight

The modular sizes of LITEX transport and storage containers mean that models with different standard dimensions will all fit on a Euro pallet.

Type	External dimensions (LxWxH – in mm)	Internal dimensions (LxWxH – in mm)	Clearance (LxW – in mm)	Number of handles	Number of catches
EF3001	400x300x340	383x272x300	375x264	1	1
EF3002	600x400x220	571x372x188	563x364	2	2
EF3003	600x400x400	571x372x368	563x364	2	2
EF3004	800x600x220	773x572x188	765x564	4	2
EF3005	800x600x400	773x572x368	765x564	4	2

(Other sizes on request – prices ex-works, unpainted)

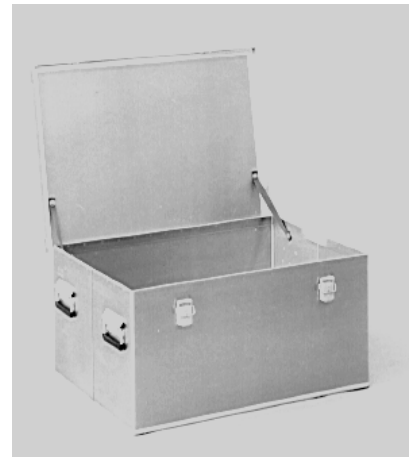

LITEX – Aluminium alloy container

Specification

The container comprises a body and a hinged lid. The body has a perimeter reinforcement around the aperture.

The container is fitted with one or two stirrup catches (according to size). A turn screw device ensures that the catches are shake proof.

One, two or four sprung handles with plastic grips (according to size of container) are riveted to the container body. Maximum weight loading 40 kg on each handle.

Painting

All containers can be supported in a plain or painted finish. All RAL colours are available.
